Sonic Automotive, Inc. Continues Portfolio Maximization Strategy; Q3 Revenues and Volume Up Over Strong Prior Year Quarter

CHARLOTTE, N.C. — October 26, 2010 — Sonic Automotive, Inc. (NYSE: SAH), one of the nation's largest automotive retailers, today reported that 2010 third quarter adjusted earnings from continuing operations were \$0.27 per diluted share, compared to an adjusted \$0.26 per diluted share from continuing operations in the same prior year quarter. The adjustments are detailed further in the attached tables.

Business Overview — Strong Top Line Growth Over Prior Year

Commenting on the quarter, B. Scott Smith, the Company's President, said, "Our total revenues were up approximately 9% over a prior year quarter that included the positive effects of the Cash for Clunkers program. Our strategy of portfolio maximization is built on utilizing predictable, repeatable and sustainable processes at our dealerships through our operating playbooks. These playbooks, coupled with the lowest associate turnover rate in our Company's history, are driving our current operating performance. As we increase revenue in a challenging yet improving economic environment, we continue to take steps to control expenses. We expect to see the results of some recent activity on this front as we progress through the fourth quarter and head into next year."

Capital Structure — Lower Debt and Strong Cash Flow Generation

During the third quarter, the Company completed the redemption of \$20 million of its 8.625% senior subordinated notes. The Company also recently announced the planned redemption of the remaining \$16 million of its 4.25% convertible notes. Mr. Smith commented, "The \$49 million of debt repurchases which we will have completed this year will save us \$3.5 million in annual cash interest expense. We expect to use our excess cash flow from operations to further reduce our non-mortgage debt over the next several years. At the same time, we expect to continue to replace our leased dealerships with mortgaged properties as the opportunity arises. With the internal growth opportunities we see in our portfolio maximization strategy, we expect to drive future revenue and profit growth without the risk and capital commitment associated with dealership acquisitions."

New and Used Retail Vehicles — Combined Revenue Increases 9%

New vehicle retail revenue increased 4% and used vehicle retail revenue increased 20% for the third quarter of 2010 compared to the same quarter last year. Jeff Dyke, the Company's EVP of Operations, stated, "We are pleased with the growth in our new vehicle revenue given that our strong import and luxury brand mix benefited in such a big way from the Cash for Clunkers program last year. Our 20% growth in used vehicle revenue was fueled by 15% volume growth along with a 5% increase in the average selling price. Every quarter we move closer to our near-term goal of 100 used vehicles per store per month. We have seen our average grow by approximately 30 vehicles per dealership since we started this process. Increasing that average at each dealership by another 25 vehicles per month would add over \$600 million in annual revenue based on this quarter's average selling price. That's why we remain convinced that our focus on portfolio maximization and internal growth is the right strategy at this point in our Company's evolution."

Service, Parts & Body Shop — Revenue Growth Continues in Key Profit Center

Sonic's Service, Parts & Body Shop revenue for the third quarter was up nearly 6% compared to the prior year quarter. Mr. Dyke stated, "Our customer pay business was up 4% and we saw some stabilization in our warranty repair business. We have seen steady growth in this high margin piece of our business all year and, if these trends continue, our current group of stores is on track to deliver their highest annual fixed operations gross profit. We have several exciting pilot programs underway to drive more customer traffic in this key area of our business."

Cautionary Notice: Forward-Looking Statements

This presentation contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to future events, are not historical facts and are based on our current expectations and assumptions regarding our business, the economy and other future conditions. These statements can generally be identified by lead-in words such as "believe", "expect", "anticipate", "intend", "plan", "foresee", "may", "will" and other similar words. Statements that describe our Company's objectives, plans or goals are also forward-looking statements. Examples of such forward-looking information we may be discussing in this presentation include, without limitation, further implementation of our operational strategies and playbooks, future debt retirement, capital expenditures, operating margins and revenues, inventory levels and new vehicle industry sales volume.

You are cautioned that these forward-looking statements are not guarantees of future performance, involve risks and uncertainties and actual results may differ materially from those projected in the forward-looking statements as a result of various factors. These risks and uncertainties include, among other things, (a) economic conditions in the markets in which we operate, (b) the success of our operational strategies, (c) our relationships with the automobile manufacturers and (d) new and used vehicle sales volume. These risks and uncertainties, as well as additional factors that could affect our forward-looking statements, are described in our Form 10-K for the year ending December 31, 2009 and our Form 10-Q for the quarter ending June 30, 2010.

These forward-looking statements, risks, uncertainties and additional factors speak only as of the date of this presentation. We undertake no obligation to update any such statements.
